

- Graphics as designed by Michael Berglund of Canopy Productions in Minneapolis, MN who has also assisted with the Houston exhibit.
- Banners were printed by Northcutt Banner Corporation also of Minneapolis.
- Exterior sign work - vinyl by Classy Threads, sign metal by Randy Shores/Randy's Machine Shop both of Malta.

Interior banners, total of four, showcasing facility specimens:

Roberta, Leonardo, Ralph and Arrow

Exterior entrance sign with US Highway frontage. Bottom portion of sign incomplete as shown. Final sign will feature similar graphic for Phillips County Museum in join sign effort. Sign is located on County Museum property and features both facilities within Museum Complex.

Main entrance to Great Plains Dinosaur Museum. Welcome.

Exterior landscape features natural dinosaur setting of dig site in northern Phillips County. Sage brush, junipers and yucca will growth with seasons.

Fiberglass bone bed panel has been installed to add to aesthetics of landscaping and provide exploratory bone bed/dig bit.

Bone bed features duck bill dinosaur and TRex bone skeletons similar to those found locally.

Depicting the area where Leonardo the Mummy Dinosaur was unearthed.

The diorama and faux wall was designed by local taxidermist Krissy Weakly of Milk River Mounts and artist Judy Michael.

Brochure rack featuring members of the Dinosaur Trail is also shown.

Interior display wall constructed, new maps, display boards - purchased with TIIP funds

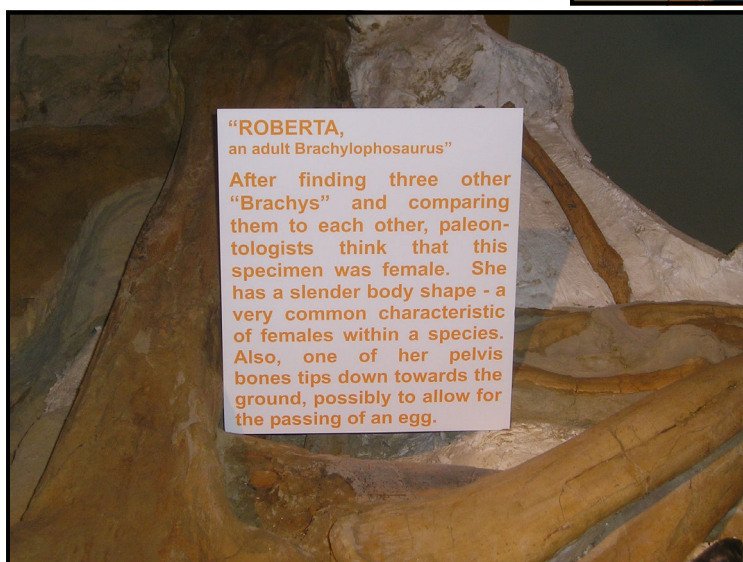

Styraecosaurosaurus

This Ceratopsian (a "horned" dinosaur) roamed prehistoric Montana, reaching lengths of 10m. It was one of the first horned dinosaurs to be discovered.

Its skull had an extensive bony frill with two large openings situated asymmetrically on either side of the frill. These openings would have reduced the weight of the frill.

These fossil remains are from the edge of the frill of Styraecosaurosaurus.

Adults: \$5  
Children (12yr and younger): \$3  
Children (5yr and younger): Free
